# ABOUT GREEN PLATES

LEAFALL  
BIO DEGRADABLE PLATES

Areca leaf plates are a sustainable alternative to plastic/polymer products which leave a high carbon footprint behind. They can replace paper-based products made out of trees. A 100% natural process is followed for manufacturing these plates. Fallen areca leaves are collected from the farms. Then the sheath of the areca leaves is cleaned and soaked in water for approximately 15 minutes and dried for 30 minutes. They are later compressed to different shapes using a mold based machine. The finished products are aggregated and packed as per the customer requirement.

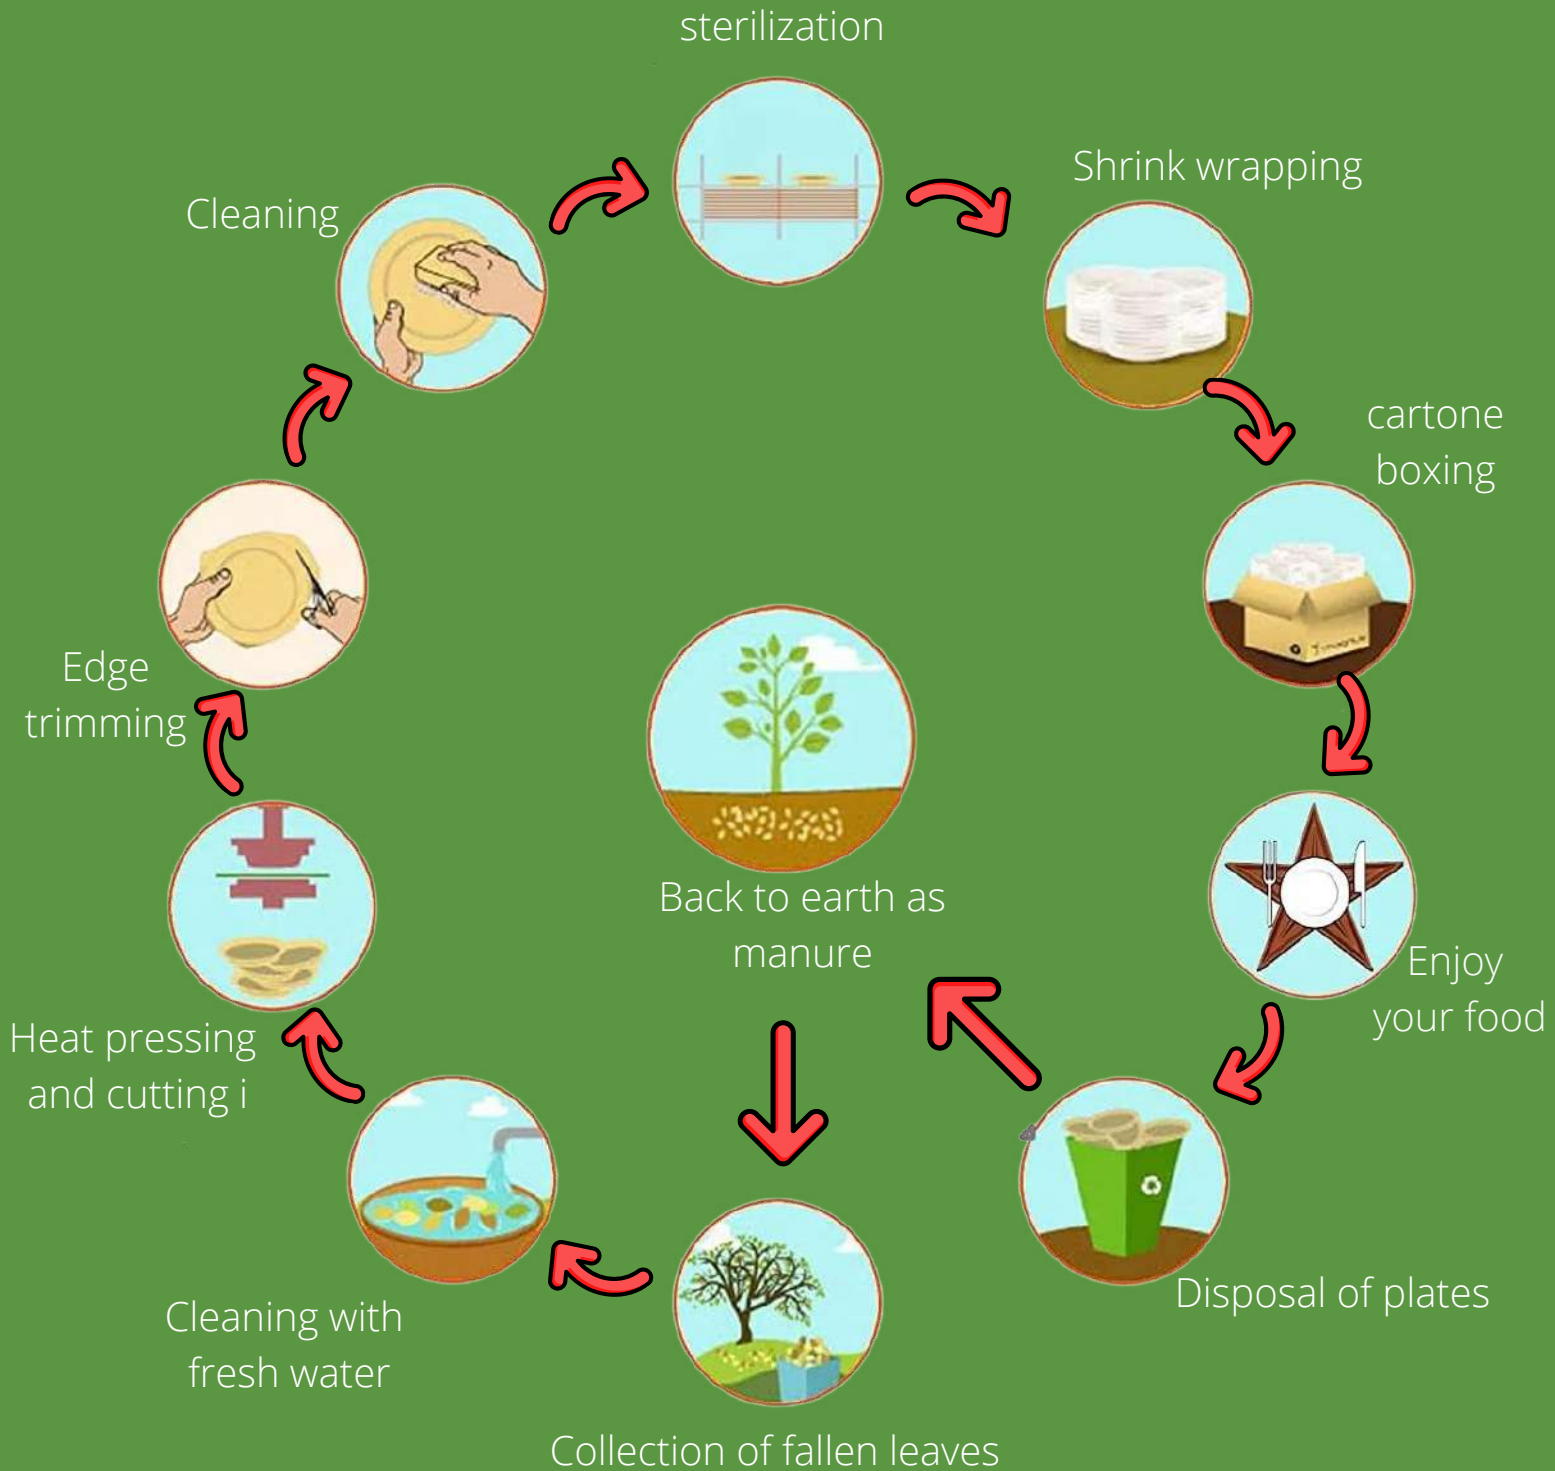

## BENEFITS OF GREEN PLATES

- Eco-friendly, Bio-degradable, and Compostable.
- 'Waste 2 wealth' concept.: Fallen leaves are collected and turned into value-added products without any deforestation.
- No chop down of trees, fallen leaves are collected and turned to value added products. Waste to wealth concept.
- No chemicals, bleaching, PE (Polyethylene) coating, or wax coating at any stage.
- Lightweight, sturdy and uncrushable.
- Holds liquid items for 4 hours without leakage
- Microwave & Refrigerator safe. Holds liquid items for 04 hours without leakage.
- Good for hot, wet, and cold food items.
- Easy Waste Disposal: Degradation within 60 days.
